

The Experts in Water and Wastewater Solutions

Delivering tailored solutions to clients across the Southeast for more than 30 years

We specialize in providing efficient, responsible, and cost effective solutions.

Our team of professional engineers and professional geologists solve unique challenges through our integrative and innovative approach to environmental and civil engineering.

Achieve regulatory compliance

Reduce costs

Solve complex problems

Shrink environmental footprint

OVER 98% OF THE PROJECTS PERFORMED OVER THE LAST 20 YEARS HAVE BEEN SOLVING WATER & WASTEWATER ISSUES FOR CLIENTS

SERVING A WIDE RANGE OF INDUSTRIES, INCLUDING:

- Food and Beverage
- Paper Processing
- Water and Wastewater
- Oil and Gas
- Schools and Campuses
- Municipalities

OUR TECHNICAL
STAFF HAS A
CUMULATIVE
120 YEARS
OF EXPERIENCE
SOLVING
WATER & WASTEWATER
PROBLEMS

Engineering Services

Industrial Wastewater Treatment

Each industrial application is unique. We analyze existing processes and develop a plan to address compliance issues at a reasonable cost.

Site Assessment and Remediation

We conduct assessments in accordance with ASTM guidelines, assisting clients with site investigation including assessment, risk evaluations, and corrective action.

Facility Management and Operations

We offer training, maintenance, and full facility management to clients with small to medium flow wastewater systems.

Water and Wastewater Treatment

Developing solutions for your water and wastewater issue is our specialty - from optimizing your existing facility to implementing new technology.

Environmental Engineering Services

We offer a wide range of services from development of best management practices to spill response plans to address compliance issues.

Water Quality and Hydraulic Modeling

By using in-house lab equipment and providing expertise with modeling software we can create a water quality or hydraulic model to evaluate your problem.

Environmental Compliance

Services include NPDES and UIC permit application development, discharge monitoring for permit compliance, and groundwater monitoring for site compliance.

Civil Engineering and General Services

MEI provides master planning, site development, stormwater management, and GIS development services.
